- English - A2

ABOUT

I'm purposeful and highly motivated manual QA Engineer with experience in software testing of web and mobile applications. I worked with Scrum and Kanban methodologies. Currently studying Python and creating my first auto-tests

WORK EXPERIENCE

QA ENGINEER

Gilzor | Sep 2022 - now | Warsaw

The only QA in the Team of Front-, Backend Developers, PO and UX. I was working on different web and mobile projects:

- conducting the full flow of testing (reviewing requirements, creating test documentation, doing functional and non-functional testing, reporting and validating bugs);
- investigating the problems from Production: looking for steps to reproduce, checking DB records from complainer;
- using tools (xCode, Android Studio) to install builds, get logs, use Simulators;
- working with Scrum methodology;
- writing simple auto-test on Python;

QA ENGINEER

PR3 Marketing Service | Dec 2021 - Jul 2022 | Minsk

The QA in the Team of QAs, Developers, PO and BAs. My responsibilities:

- working with requirements (User Stories, Specification) and estimations;
- web and mobile testing (functional, regression, smoke, exploratory);
- writing test documentation (checklists, test cases); reporting and verifying bugs and improvement tasks;
- participating in meetings (QA sync, Daily status, Retro);
- working with Kanban methodology;

EDUCATION

- BELHARD, training course

Software Testing | February, 2021 - May, 2021 | Minsk

- UX MIND, training course

Web designer UX/UI | December, 2020 - February, 2021 | Minsk

- MITSO, university

Logistics | 2018 - 2022 | Minsk
